

4-Line Scan Lens

「R, G, B + NIR」

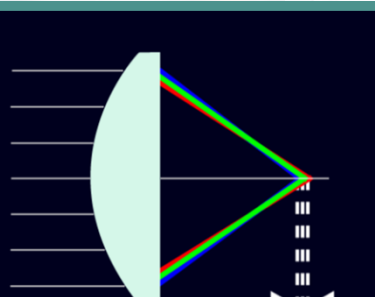

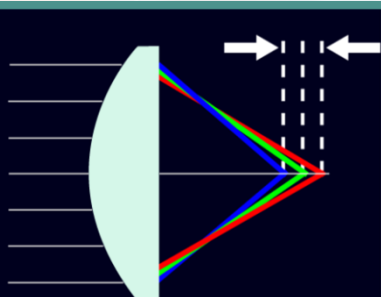

TUSS
Since 1984

R·G·B + NIR Simultaneous focus

4K, 4,096×4 sensor compatible

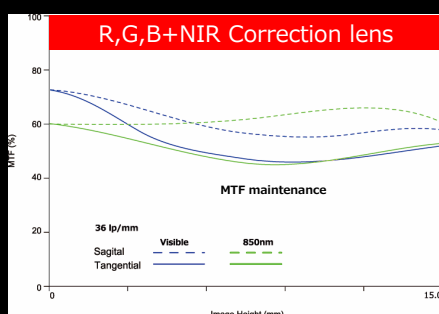

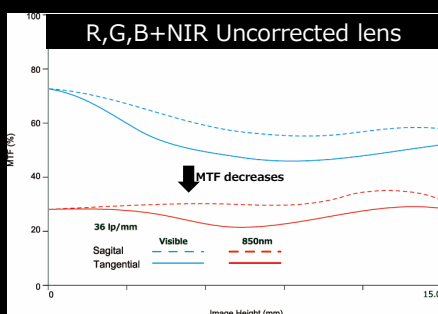

FB:12mm M42mount

This specification is ideal for
“TeledyneDALSA Linea2”
“Chromasens allPIXA neo 6k CXP Color-NIR”

Aligns the focal points of R, G, B, and NIR.

Corrects chromatic aberration between visible light and 850nm.

It maintains visible light resolution even at 850nm.

No refocusing required between visible light and 850nm.
